Give the Gift of Life! (cont. from pg. 1)

support organ, eye and tissue donation and see it as the final act of love and generosity toward others.

Fact: If you are sick or injured and admitted to the hospital, the number one priority is to save your life. Organ, eye and tissue donation can only be considered after you are deceased.

Fact: When you are on the waiting list for an organ, what really counts is the severity of your illness, time spent waiting, blood type, and other important medical information, not your financial status or celebrity status.

Fact: There is no cost to the donor or their family for organ or tissue donation.

STATISTICS:

Although there have been advances in medical technology and donation, the demand for organ, eye and tissue donation still vastly exceeds the number of donors. For more information, read the summary below or create a detailed data report on the UNOS Web site.

Almost 100,000 men, women and children currently need life-saving organ transplants.

Every 12 minutes another name is added to the national organ transplant waiting list.

An average of 18 people die each day from the lack of available organs for transplant.

In 2005, there were 7,593 deceased organ donors and 6,895 living organ donors resulting in 28,108 organ transplants.

In 2005, 44,000 grafts were made available for transplant by eye banks within the United States.

Approximately 1,000,000 tissue transplants are performed annually.

According to research, 98% of all adults have heard about organ donation and 86% have heard of tissue donation.

90% of Americans say they support donation, but only 30% know the essential steps to take to be a donor.

Beer Geek

Beer nose - what is it?

Beer nose is the general taste and aroma we experience while drinking beer. The nose depends on the alcohol content, carbon dioxide, extract and chemical composition of beer, i.e. volatile fragrant liquids offering flowery or fruit aromas, like higher alcohols, esters and aldehydes.
